

Rohit Tale

B.Tech in Artificial Intelligence

[+91 9561491689](tel:+919561491689) | rohit.tale1913@gmail.com | [Linkedin](#) | [GitHub](#) | Nagpur, Maharashtra.

PROFESSIONAL SUMMARY

Aspiring Artificial Intelligence Engineer skilled in Machine Learning, Computer Vision, and full-stack development (React.js, Node.js, MongoDB), with experience building multiple scalable, real-time applications. Proficient in Python, Java, SQL, REST APIs, DSA, and OOP, focused on delivering efficient, data-driven solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, HTML, CSS, JavaScript, PL/SQL.

Frameworks/Libraries: Express.js, Node.js, Tailwind, NumPy, Pandas, Matplotlib.

Databases: MySQL, MongoDB.

Version Control: GIT.

Tools: Oracle SQL Developer, Postman, Git Hub, VS Code.

Concepts: Machine Learning, Computer vision, CNN, ANN.

AI Tools: GitHub Co-pilot , Cline, Claude, Continue.

PROJECTS

Virtual Basket-Ball Referee (AI-based virtual referee system)

November 2025 – Present

- Developed an AI-based virtual referee system as part of a team, focusing on **computer vision model development and event detection algorithms**.
- Implemented **player tracking and foul detection** using real-time video processing and sensor data.
- Built algorithms for **event classification and analytics generation**, improving decision-making accuracy.
- Collaborated closely with Product Owners and QA/Testers to analyse requirements, resolve issues in existing APIs, and ensure smooth delivery of new features.
- Increased officiating accuracy by **25%** and reduced human error by **30%** during gameplay analysis.
- Worked extensively on **databases** by creating and maintaining tables, stored procedures, and triggers to support application functionality.
- Where I contributed to developing **computer vision models** and **real-time tracking algorithms** for player detection and **foul recognition**.

Elective Selection Portal (Centralized web platform for managing elective selection)

February 2025 – Present

- Built a centralized elective selection system in a team, contributing primarily to **database design, backend development, and authentication system**.
- Implemented **role-based access control (RBAC)** for students and admins, ensuring secure and structured data handling.
- Developed optimized **CRUD operations** and improved database queries, enhancing system performance for large student datasets.

- Improved API response times and overall application performance through code optimization, efficient query design, and database tuning.
- Reduced manual selection errors by **50%** and improved administrative workflow efficiency by **35%**.
- Leveraged AI-assisted development tools including **GitHub Co-pilot, Cline**, and Continue to improve code quality, increase development efficiency, and deliver user stories faster.

RELEVANT COURSEWORK

- Object-Oriented Programming
- Database Management Systems
- Operating Systems
- Software Engineering

ACHIEVEMENTS & ACTIVITIES

- Webmaster, IEEE CIS Chapter, GHRCEM (2024– 2025)
- Organized technical talks and hands-on sessions on AI and ML.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence | 2022-2026

GH. Raison College of Engineering and Management | *Nagpur CGPA*

– 7.1
